

Physical Water Conditioning, Correcting, Balancing since 2008.

Chemical-Free, Energy-Free, Maintenance-Free.

Spinbolt™ Product Information and Technical Specs

Kicking centrifuge action up a notch

OVERVIEW

The Spinbolt™ water conditioner is an adaptation of the Rainbolt™ that adds flow-directing fins through its entire internal length. These divert the flow of the water away from the center, creating a vortex-like whirl as water passes through. This amplified-impact of centrifuge-like flow spin speeds the separation of the water itself from gases, minerals or particulates within the water. In concert with magnetic/electrical grooming, the water that flows out is in much better condition than the water that came in.

With magnetic vortexing for boosted separation, bust salts, mitigate mineral scale, improve soil infiltration, improve moisture retention and boost soil health, but with upgraded power—resulting in premium quality water which yields higher productivity per drop. Easy to install, all the goodies for compact and efficient treatment where static mixing powers up the results. Perfect for spaces that don't have room for an Aquabolt™ but need a step up from Rainbolt™.

FEATURES

- Available in 316 stainless steel
- NPT threads
- Zero chemicals, energy, consumables or maintenance
- Passive, in-line system
- Zero by-products
- 2-year satisfaction money-back guarantee
- Proudly designed and made in USA with 100% US materials

APPLICATIONS

- Agriculture, greenhouses
- Irrigation
- HVAC and industrial use
- Residential use, & more

Spinbolt™ Technical Specs

3-stage magnetic vortex treatment for boosted separation

PRODUCT CODE	MATERIAL	INTERNAL DIAMETER	EXTERNAL DIAMETER	LENGTH	WEIGHT	FLOW RATE	RETAIL PRICING
MG-SPINBOLT-3/4-SS	SS	.75 in	2.325 in	7 in	2 lbs	up to 55 gpm	\$1,275
